## CIOMP Brief Introduction

### Ms. Tong Zhang

Changchun Institute of Optics, Fine Mechanics and Physics (CIOMP), China

The Changchun Institute of Optics, Fine Mechanics and Physics (CIOMP) was founded in 1952 focusing on luminescence, applied optics, optical engineering, and precision mechanics and instrumentation. In this presentation, Ms. Tong Zhang will give a brief introduction about CIOMP, including the history, research results and the international cooperation of CIOMP in recent years. Meanwhile, she will make a short introduction about the Guo China-US Photonics Laboratory, which is led by Prof. Chunlei Guo and located in Changchun, China. It is based on research labs in two institutions that gave birth to optics in China, CIOMP, and in the US, the Institute of Optics at University of Rochester.
