

EFFICIENT LASER SURFACE FUNCTIONALIZATION

Eco-friendly technology creating new properties on the treated material surface.

Benefits

- Friction and wear resistance
- Water and bacteria repellence
- Anti-Icing
- Modulation of optical properties
- Decorative and aesthetic

Materials

- Metals and alloys
- Glass and dielectrics
- Polymers
- Composite materials

Performance

Super-hydrophobicity / self-cleaning surface	SCA up to 180°
Hydrophilicity	SCA < 10°
Reflectance	< 5% of UV to near IR (NIR)
Reduced bacteria growth	up to 98%
Productivity	> 100 cm²/min

Laser Systems and Equipment

- High intensity ps laser systems (<2 ps, 1-10 mJ, 1-100 kHz @ 1030 nm)
- Exceptional beam quality (M²<1.2)
- From IR – UV
- Different scanners

HiLASE Services

- Evaluating customers problem
- Proposing suitable structure
- Creating and testing sample surfaces
- Process development and optimization
- Consulting and support during process implementation

- ✓ **Multi beam approach** (DLIP and DOE)
- ✓ **Dual size structures** (nm and μm size structures)
- ✓ **Custom laser system design** with process specific parameters

Areas of Application

AEROSPACE

AUTOMOTIVE

BIOMEDICAL AND PHARMACEUTICAL

POWER GENERATION

TOOLING

FOOD PRODUCTION

HOME APPLIANCES
